Open to Remote / Hybrid / Contract opportunities worldwide — full overlap with European working hours.

PROFESSIONAL SUMMARY

Senior Software Engineer and Technical Consultant with 20+ years of experience building, deploying, and supporting enterprise software, SaaS platforms, and mission-critical systems across banking, healthcare, media, and startups. Deep PHP/Laravel expertise combined with a strong track record of technical leadership, product delivery, and direct client engagement. Proven ability to guide products end-to-end, automate DevOps pipelines, and lead incident resolution for platforms serving millions of users — now delivering faster through AI-augmented development workflows.

CORE COMPETENCIES

Engineering & Architecture: PHP (Core & Laravel 6–12), REST APIs, third-party integrations, MySQL design & query optimization, Linux, AWS, WHM/cPanel

DevOps & Reliability: CI/CD (GitHub Actions, GitLab), deployment automation, production support, incident resolution, application monitoring, high-availability systems

Product & Leadership: End-to-end delivery, requirements gathering, technical/project leadership, cross-functional collaboration, client support & engagement

AI-Augmented Development: Claude Code, AI-assisted engineering workflows, rapid prototyping with LLMs, AI-assisted code review, requirements & documentation generation

Tools: PhpStorm, Composer, Git, Trello, Balsamiq, Amazon QuickSight, Slack, Zoom, Notion

PROFESSIONAL EXPERIENCE

Founder & Principal Software Consultant | Blueflag Digital

Feb 2026 – Present

- Architect and deliver custom web and SaaS applications for SMEs, managing client engagements end-to-end from requirements through deployment and support.
- Build production systems using Laravel and modern AI-assisted development workflows (Claude Code), accelerating delivery timelines.
- Provide Laravel consulting, cloud deployments, system architecture, and ongoing client technical support.

Lead Developer | Afya Analytics

Oct 2025 – Feb 2026

- Led development teams building secure, enterprise-grade healthcare management information systems (HMIS) on modern Laravel versions.
- Managed stakeholder requirements to define product technical roadmaps and system improvements.
- Overhauled deployment and infrastructure troubleshooting protocols to ensure high availability of mission-critical systems.

Software Engineer | Stanbic Bank Kenya Ltd

Feb 2023 – Sep 2025

- Engineered core backend components supporting high-volume, secure digital banking channels.
- Co-led DevOps transformation, building and optimizing automated CI/CD pipelines (GitHub Actions) to increase deployment reliability and efficiency.
- Provided high-tier production support and rapid incident resolution for critical financial systems.

Systems Developer | Content Aggregation Limited (Viusasa)

Feb 2020 – Jan 2023

- Co-engineered the backend systems and APIs for Viusasa 2.0, scaling a video-on-demand platform to over 3.5 million active users.
- Optimized complex MySQL structures, indexes, and query execution plans to reduce application latency and improve scalability.
- Implemented security controls, collaborated with third-party vendors on production issues, and authored technical documentation to standardize maintenance and onboarding.

Senior Developer & Business Systems Consultant | Nate Technologies *Jan 2019 – Jan 2020*

- Built custom enterprise and web-based business systems (PHP/MySQL), including retail management, USSD, and e-learning solutions for multiple organizations.
- Managed client requirements gathering, deployment, and support processes.

Systems Developer | Switch TV *Jun 2018 – Dec 2018*

- Contributed to frontend development of a video-on-demand web application, delivered on tight timelines within a .NET/C# ecosystem.

Systems Developer & Consultant | Collabmed Solutions Ltd *Nov 2015 – May 2018*

- Led development teams implementing large-scale hospital management information systems (HMIS) deployed across multiple hospitals.
- Supported deployment, testing, and maintenance of mission-critical healthcare systems and collaborated with stakeholders on scalable, secure solutions.

EDUCATION

HND in Computing Studies — University of Sunderland (Intel Computers Study Center), 2003–2005
